<p>We have refined our methodology on Buy Recommendations and therefore, some of the lower yielding companies above would not currently have met our buy criteria.</p>									

#### Disclosure:

Investors should consult with their investment advisors, analysts or broker before purchasing any securities mentioned in our service. We are not an investment financial planner or a securities advisor and do not claim to be. We bring this information to your attention based upon our personal views of the markets and market behaviour. Our decision to issue a Buy Alert is highly subjective and based upon our personal interpretation of the recent insider trading activity accumulated from a variety of sources, including the SEC (Securities Exchange Commission), OCS (Ontario Securities Commission), Yahoo Finance and other sources. Subscribers should not assume that our recommendations, insights or philosophies will ensure a profitable investment.

Investors/subscribers should assume that we own securities in all of the above companies, if this bothers you do not buy them. We may establish positions before issuing a Buy Alert and sell immediately before issuing a Sell Alert. Our positions will never be large enough to 'move the markets' in any significant manner. Your success and ours will be subject to our abilities to perform consistently in identifying new companies to buy and the timeliness of our Sell Alerts. Investors must realize that gains cannot be guaranteed.

The gains reflected above while very impressive cannot and should not be viewed as an indicator for future results.
